1. Basis of Presentation

These unaudited financial statements have been prepared in accordance with Canadian generally accepting accounting principles ("Canadian GAAP") for interim financial information and follow the same accounting policies and methods of application as the most recent audited financial statements of the Company for the year ended December 31, 2007. These interim financial statements do not include all the information and note disclosures required by Canadian GAAP for annual financial statements and therefore should be read in conjunction with the Company's audited financial statements and the notes thereto for the year ended December 31, 2007. In management's opinion, all adjustments considered necessary for fair presentation have been included in these financial statements. Interim results are not necessarily indicative of the results expected for the fiscal year.

2. Changes in Accounting Policy

On January 1, 2008, the Company adopted the recommendations included in the following Sections of the Canadian Institute of Chartered Accountants Handbook: Section 1535, "Capital Disclosures," and Section 3862, "Financial Instruments - Disclosures."

(a) Section 1535, "Capital Disclosures"

This Section establishes standards for disclosing information about a company's capital and how it is managed. Under this standard the Company will be required to disclose the following, based on the information provided internally to the Company's key management personnel:

(i) qualitative information about its objectives, policies and processes for managing capital;
(ii) summary quantitative data about what it manages as capital;
(iii) whether during the period it complied with any externally imposed capital requirements to which the Company is subject; and
(iv) when the Company has not complied with such externally imposed capital requirements (if any), the consequences of such non-compliance.

As required under Section 1535, the Company's objectives, policies and processes for managing capital are as follows:

The Company manages its common shares, options and warrants as capital. As the Company is in the exploration and development stage, its principal source of funds for its operations is from the issuance of common shares. The issuance of common shares requires approval of the Board of Directors. It is the Company's objective to safeguard its ability to continue as a going concern, so that it can continue to explore and develop its Prairie Creek project for the benefit of its stakeholders. The Company primarily uses stock options to retain and provide future incentives to key employees and members of the management team. The granting of stock options is primarily determined by the Compensation Committee of the Board of Directors.

2. Changes in Accounting Policy (continued)

(b) Section 3862, "Financial Instruments – Disclosure"

The new disclosure standard requires companies to provide disclosure of quantitative and qualitative information in their financial statements that enable users to evaluate (a) the significance of financial instruments for the company's financial position and performance; and (b) the nature and extent of risks arising from financial instruments to which the entity is exposed during the period and at the balance sheet date, and management's objectives, policies and procedures for managing such risks. Companies will be required to disclose the measurement basis or bases used, and the criteria used to determine classification for different types of instruments.

The Section requires specific disclosures to be made, including the criteria for:

(i) designating financial assets and liabilities as held for trading;
(ii) designating financial assets as available-for-sale; and
(iii) determining when impairment is recorded against the related financial asset or when an allowance account is used.

See Note 11 for disclosures related to financial instruments.

3. Short-term Investments

Short-term investments, which consist primarily of investments in Bankers Acceptances and Guaranteed Investment Certificates, are investments with maturities of more than three months and less than one year when purchased. As at June 30, 2008, short-term investments were valued at $19.617 million, earning income at rates ranging from 2.9% to 4.2% (December 31, 2007 - $21.495 million, earning income at rates ranging from 3.4% to 5.75%). The Company has designated its short-term investments as held for trading assets. Interest income and changes in market value on short-term investments are recorded in interest income in the Statement of Operations; accrued interest earned but not yet received is included in other receivables on the balance sheet. The market value of these assets is based upon quoted market values and the recorded amounts, at June 30, 2008, approximate fair value for these investments.

4. Marketable Securities

Canadian Zinc Corporation has an investment in Copper Mesa Mining Corporation ("Copper Mesa"), holding approximately 764,596 Copper Mesa shares and approximately 902,160 Copper Mesa warrants.

The market value of the Copper Mesa shares held by the Company, as at June 30, 2008, was approximately $69,000 (December 31, 2007 - $100,000). The loss in market value has been recorded in the Statement of Operations in accordance with the Company's designation of the marketable securities as held for trading assets.

5. Restricted Cash

The Company has $214,000 (December 31, 2007 - $nil) of cash on hand, which is restricted as security for a letter of guarantee issued by a financial institution, to secure performance by the Company of certain obligations pursuant to an authorization from Fisheries and Oceans Canada ("DFO") (see Notes 6 and 12).

(Tabular amounts are in thousands of Canadian dollars, except for shares, price per share and per share amounts)

6. Resource Interests

The Company's resource interests comprise the Prairie Creek Mine Property:

Exploration and development costs, end of period	$ 34,212	$ 26,120	$ 34,212	$ 26,120

6. Resource Interests (continued)

The Company conducted an underground drilling program at the Prairie Creek Mine that commenced in 2006 and continued through to the end of 2007. During the six months ended June 30, 2008, the Company incurred further expenditures relating to the demobilization of the contractor's equipment and finalization of the work program. Following completion of the contract, a reconciliation of the project costs was performed which resulted in a cost recovery of $942,000 which was paid to the Company in April 2008.

The Company holds a 100% interest in the Prairie Creek Mine property and plant and equipment located in the Northwest Territories, Canada.

In 1996, the Company concluded a Co-operation Agreement (the "Agreement") with the Nahanni Butte Dene Band ("Nahanni"), part of the Dehcho First Nations. In return for co-operation and assistance undertakings given by Nahanni towards the development of the Prairie Creek Project, the Company granted the following net profit interest and purchase option to Nahanni:

(i) A 5% annual net profits, before taxation, interest in the Prairie Creek Project, payable following the generation of profits after taxation equivalent to the aggregate cost of bringing the Prairie Creek Project into production and establishing the access road; and

(ii) An option to purchase either a 10% or a 15% interest in the Prairie Creek Project at any time prior to the expiry of three months following permitting for the Project, for the cash payment of either $6 million or $9 million, subject to price adjustment for exploration expenditure and inflation, respectively.

In October 2003 Nahanni informed the Company that Nahanni considers the Agreement terminated. Such termination is not in accordance with the provisions of the Agreement. The Company is currently re-negotiating the Agreement with Nahanni.

The Company holds various licences and permits required in order to maintain and perform current activities at the Prairie Creek Mine site. A summary of permits and licences granted to the Company subsequent to December 31, 2006 is noted below.

On April 10, 2007, the Mackenzie Valley Land and Water Board issued a Land Use Permit for use of the road which connects the Prairie Creek Mine with the Liard Highway. The Land Use Permit (MV2003F0028) is valid for five years to April 10, 2012. Under the terms of the Permit, a security deposit in the amount of $100,000 is payable prior to the first use of the road (see Note 13 – Subsequent Events).

On March 20, 2008, the Mackenzie Valley Land and Water Board issued a Type B Water Licence (MV2007L8-0026) to permit remediation of a portion of the winter road. The Water Licence is valid for five years to March 20, 2013.

In June 2008, the Company entered into a letter of guarantee in the amount of $214,000 in favour of DFO to secure performance by the Company of certain obligations pursuant to authorization from DFO to perform certain road repairs in proximity to the Prairie Creek Mine site. The Authorization from DFO was received on July 15, 2008.

(Tabular amounts are in thousands of Canadian dollars, except for shares, price per share and per share amounts)

Furniture, fixtures & equipment	107	81	26
Leasehold improvements	60	8	52
	$ 968	$ 520	$ 448

8. Asset Retirement Obligation

The fair value of the asset retirement obligation is based on information currently available, including the Company’s obligations to undertake site reclamation and remediation in connection with its Prairie Creek Mine Site infrastructure and development and applicable regulations. However, the ultimate amount of the asset retirement obligation is uncertain.

The total undiscounted amount of the estimated cash flows required to settle the Company’s reclamation and remediation obligations, as at June 30, 2008, is estimated to be $2.75 million (December 31, 2007 - $2.5 million). While it is anticipated that some expenditures will be incurred during the life of the operation to which the obligations relate (should mining activity commence), a significant component of this expenditure will only be incurred at the end of the mine life.

The fair value of the estimated cash flows has been estimated at $1.486 million as at June 30, 2008 (December 31, 2007 - $1.228 million). In determining the fair value of the asset retirement obligation, the Company has assumed a long-term inflation rate of 2.5%, a credit-adjusted risk-free discount rate of 6.5% and a weighted average useful life of production facilities and equipment of ten years. Elements of uncertainty in estimating this amount include changes in the projected mine life, reclamation expenditures incurred during ongoing operations and reclamation and remediation requirements and alternatives.

(Tabular amounts are in thousands of Canadian dollars, except for shares, price per share and per share amounts)

8. Asset Retirement Obligation (continued)

A summary of the Company's provision for asset retirement obligation and reclamation is presented below:

		Six months ended June 30, 2008		Year ended December 31, 2007

9. Share Capital

Authorized: Unlimited common shares with no par value (December 31, 2007 – unlimited).

Issued and outstanding: 120,685,063 common shares (December 31, 2007 – 120,213,962).

During the six months ended June 30, 2008, 471,101 warrants were exercised at a price of $0.72 per common share for proceeds of $340,000.

10. Stock Options, Warrants and Contributed Surplus

(a) Stock Options

The Company has an incentive stock option plan in place under which it is authorized to grant stock options to directors, executive officers, employees and consultants. At June 30, 2008, the Company was allowed to grant up to 10% of the issued share capital of the Company as stock options. Stock options are exercisable once they have vested under the terms of the grant. A summary of the Company's options at June 30, 2008 and the changes for the three and six month periods then ended is presented below:

	Three months ended June 30,

11. Financial Instruments

(a) Fair Values: As at June 30, 2008, the recorded amounts for cash and cash equivalents, other receivables and prepaid expenses, accounts payable and accrued liabilities approximate their fair value due to their short-term nature. The Company has designated its cash and cash equivalents and short-term investments as held for trading assets.

(b) Interest rate risk: Included in the loss for the period in these financial statements is interest income on the Company's cash and cash equivalents and short-term investments. If interest rates throughout the period had been 100 basis points (1%) lower (higher) then net loss would have been approximately $136,000 higher ($136,000 lower) for the six months ended June 30, 2008. The Company does not have any debt obligations which expose it to interest rate risk. As described below, the Company places its cash and cash equivalents and short-term investments with high credit quality financial institutions which have invested the funds in AAA debt instruments.

(c) Credit risk: The Company does not currently generate any revenues from sales to customers nor does it hold derivative type instruments that would require a counterparty to fulfil a contractual obligation. The Company has never held any asset-backed paper instruments.

Financial instruments that potentially subject the Company to credit risk consist of cash and cash equivalents and short-term investments. The Company places its cash and cash equivalents and short-term investments (which consist of Bankers' Acceptances and Guaranteed Investment Certificates) with high credit quality financial institutions which have invested the funds in AAA debt instruments.

(d) Liquidity risk: Liquidity risk encompasses the risk that the Company cannot meet its financial obligations. The Company manages liquidity risk by maintaining sufficient cash and cash equivalent balances. Liquidity requirements are managed based on expected cash flow to ensure that there is sufficient capital in order to meet short-term obligations. As at June 30, 2008, the Company had positive working capital of $26 million. Accordingly, the Company is able to meet its current obligations and has minimal liquidity risk. However, it is likely that the Company will require additional funding in the future in order to complete the development of the Prairie Creek Mine site and bring the mine into production. Accordingly, there is a risk that the Company may not be able to secure adequate funding on reasonable terms at that future date.

(e) Currency risk: As at June 30, 2008, the Company has no cash and cash equivalents or short-term investments in any currency other than the Canadian dollar, which is the Company's functional currency. In addition, the Company currently operates entirely within Canada.

(f) Commodity price risk: The Company's ability to raise capital to fund exploration or development activities is subject to risks associated with fluctuations in the market prices of zinc, lead and silver.

(Tabular amounts are in thousands of Canadian dollars, except for shares, price per share and per share amounts)

12. Commitments

(a) The Company has entered into operating lease agreements for office space and equipment. These agreements require the Company to make the following lease payments:

	Office Leases	Office equipment	Total
6 months ending December 31, 2008	$ 61	$ 4	$ 65
Year ending December 31, 2009	129	7	136
Year ending December 31, 2010	135	-	135
Year ending December 31, 2011	133	-	133
Year ending December 31, 2012	78	-	78
	$ 536	$ 11	$ 547

(b) The Company has a letter of guarantee outstanding in the amount of $214,000 as security for the Company fulfilling certain obligations pursuant to an Authorization granted by DFO relating to road repairs in proximity to the Prairie Creek Mine Site (see Notes 5 and 6).

13. Subsequent Events

(a) On July 16, 2008, the Company paid a security deposit to the Mackenzie Valley Land and Water Board, in the amount of $100,000, to satisfy the requirement under Land Use Permit (MV2003F0028) relating to the first use of the road which connects the Prairie Creek Mine to the Liard Highway.

(b) On July 29, 2008, 100,000 stock options exercisable at $0.60 per share were cancelled.
